

## KOTLIN/ JAVA DEVELOPER

**Number of Posts:** 2

**Contract Type:** Permanent – Full Time

### Job description:

We are looking for an enthusiastic and motivated Backend Developer to join our platform team. You will have the opportunity to work on and build all parts of the platform: business logic, external APIs, admin APIs, integrations with game and payment providers, as well real-time integrations with other internal systems such as the data platform and middleware.

New development will all be using Kotlin, a modern, concise, safe language which is accessible to all developers, especially those with Java experience.

### Responsibilities:

- Work in an agile team consisting of other backend developers to build and maintain microservices in Spring Boot and Kotlin to handle platform business logic.
- Liaise with other tech teams and product team to provide functionality over REST APIs.
- Participate in task estimations, planning and code reviews.
- Integrate with third party systems to allow for a greater number of products on the platform.
- Gather knowledge in business requirements to be able to ease operations.
- Collaborate with engineers across the department to identify and build on improvements to our processes and systems.

### Requirements

- Advanced knowledge of Java (2/3 years of experience)
- SQL
- Spring Framework (1 year experience)
- Basic GIT knowledge is necessary
- Working in scrum team

Skills in the following area is considered a Plus

- Kotlin
- Redis
- Docker
- MongoDB
- AWS
- Kafka

### Profile Skills

- ✓ Degree in Computer Science or related field.
- ✓ Good problem-solving skills.
- ✓ Excellent verbal communication skills and interpersonal skills.

**Training provided:** Yes, however candidate must possess the minimum requirements and training can be offered for additional skills
