

Aquaculture Shrimp Trial Coordinator

Number of Posts: 1

Contract Type: Fixed – Term contract.

Job description

A position within **AquaBioTech Group** has arisen for a suitably qualified person to work as an **Aquaculture Shrimp Trial Coordinator** on a variety of research projects at our Aquatic R&D facility known as **ABT Innovia**.

The responsibilities of the successful candidate are outlined as follows:

- Primarily involved in all aspects of shrimp research carried out at the facility, including larval rearing and live feed production, nutrition, and health-related trials.
- Required to coordinate all larvae and shrimp feeding, husbandry, water quality and health monitoring and stock control with accurate record keeping.
- Involved in the development, running, and reporting of trials, as well as performing of experimental procedures as required by the trial protocols and in line with company certifications.
- Required to draft and prepare standard operating procedures (SOP's), manuals and training guides for the rearing, husbandry, feeding etc of shrimp at all stages of their life cycle, and specific experiment-related procedures.
- Be involved in the training of other staff and interns so as to provide good level of knowledge transfer to other team members.
- Any other duties assigned directly from Management team.

The position requires a person who is highly motivated and prepared to work at the group's R&D facility known as **ABT Innovia** with a team of international staff. Reporting directly to the R&D Facilities Manager, the position is demanding, requiring a person who is highly motivated, methodical and organised. The selected person must be prepared to work to very tight deadlines in isolated and multi-functional projects and in conjunction with a team of international staff. **AquaBioTech Group** has also been awarded, and is continuously seeking to win more, research projects funded by local government and the EU.

Requirements

A successful candidate is likely to have a good solid background in aquaculture sciences, preferably with at least a M.Sc. level of education, and with experience in **shrimp husbandry and production**, and **ideally shrimp pathology**, although experienced candidates are also encouraged to apply. Experience in laboratory operating procedures and GMP and GLP is also a bonus, but not essentials as all training in these procedures will be provided.

The selected candidate will be required to speak and write English fluently, and knowledge of any other languages would be considered an asset, although not essential.

The selected candidate must have a clear passport with no travel restrictions or legal convictions and be in possession of a clean driving licence.

Training provided: In-house

Any assistance with accommodation/relocation:

The company apartments are shared between 1 or 2 staff, all with separate - private bedrooms. With the exception that the kitchen and living area are shared. One will need to pay for his/her share of the water, electricity, and internet every month. The water & electricity bill is divided between the number of people staying in the apartment (average of EUR 50 a month) and the Internet is EUR 10 per month. The apartments are very close to a supermarket, bus stop, AquaBioTech Group Office and Mosta centre.

On the first day at AquaBioTech, one will be asked to pay EUR 50 deposit. This deposit will be reimbursed if no items are missing or damaged.

Salary : Eur 16000 - 20000

How will the interviews be held : Online, via teams
